Discussion of Driveway Permit application

Historically driveway permits have been the responsibility of the Road Agent. Moving forward should the Fire Dept have a say? Also, the Town has only delt with driveways that open onto a Town road. Going forward, including those opening onto State roads would also be looked at and input given as to how they would be constructed. Involving the Road Agent and the Fire Chief in the future. Is that putting additional requirements on those departments that could adversely affect them or increase the work load? The increase in fees should offset any increase in time needed by those departments.

Meeting adjourned at 9:10pm

Respectfully submitted,
