

Cemetery Work Meeting: October 19, 2014 @ 1:00 Pleasant View Cemetery  
Present: Dale Milne, Chuck Moore, Frank Anderson

We began by reviewing the layout of lower section:

Plots start two feet from top to bottom roadway

First posts demark 14' cross roadway

Second posts demark 20' lot rows

Single lots are 48"x100" – one casket burial (or more cremations), with one foot between the lots

Cost: \$150/single lot

16x18 is a full family lot (8 people)

Frank used his tape measure to demonstrate these proportions. A discrepancy concerning the proper location of Leavitt family plot has arisen. No headstones are present to clarify this situation.

The area by N road fork is ledgy, as are several other areas, making sale of lots in those spots impossible. They are noted on the maps with an X.

We toured the upper burial ground and found many stones in need of resetting and other repairs. Among them, Tyrrel (1841-1911) is loose. The most recent stone (1997) is broken off. Frank was able to right 3-4 stones not connected to concrete bases. Chuck and Dale urged Frank to use the historical upper lot for the attention of Stone Vault's\* repair team. The cedars to be removed have been marked with pink tape. One monument has even been set upon a broken headstone (photo).

Frank mentioned that he would like a solar light for the flag pole.

Frank gave Dale the town's copies of the burial grounds' maps for her to review and return to the Town Office Building\*\*.

When the sleet began at 2:30, we adjourned.

Respectfully submitted,

Dale Milne

\*\* Maps were returned to Pixie on October 21.

\* Dale reached Stone Vault on October 20; they have Frank's and Chuck's phone numbers (DTM)

NOTE: The agenda for the November 10 meeting will cover primarily wrapping up the 2014 expenses and preparing the 2015 budget.
